Repair kit 530 0550 10

for second-generation VAG common-rail diesel engines

Manufacturer: Audi, Seat, Škoda, VW

Engines: 1.2 TDI, 1.6 TDI, 2.0 TDI

Year of manufacture: From 2008

Part no.: 530 0550 09 (SET)*
530 0550 10 (KIT)
530 0550 31 (KIT+water pump)
530 0550 32 (KIT+water pump)

OE number: 03L 198 119 A
03L 198 119 B
03L 198 119 C
03L 198 119 D

*Set = timing belt not included

Image 1: INA tensioner pulley kits 530 0550 10

All components in the timing assembly are designed to achieve the same service life and are subject to the same amount of wear.

For this reason, Schaeffler Automotive Aftermarket is the first manufacturer in the independent spare parts market to offer a full repair kit for the timing assemblies of the vehicles listed above. This kit contains a tensioner pulley, deflection pulley, timing belt and all fastening parts.

In contrast to other providers, INA therefore covers all of the vehicles listed with a single repair kit.

Two water pump kits and a tensioner pulley set are also available as optional extras.

Schaeffler Automotive Aftermarket recommends that all components are replaced when working on the timing belt.

Key to image 1:

- 1) Tensioner pulley 531 0825 10 with stud and nuts
- 2) Deflection pulley 532 0582 10 with bolt
- 3) Deflection pulley 532 0623 10 with stud and nuts
- 4) Deflection pulley 532 0161 10 with bolt
- 5) M8 x 16 bolts for camshaft
- 6) M8 x 35 bolts for high-pressure pump
- 7) Timing belt, 25 mm wide/160 teeth

All specified KITS and SETs are equipped with improved deflecting pulley 532 0623 10 (image 2, left). This pulley replaces deflecting pulley 532 0349 10 (image 2, right) used in the vehicles listed.

Compared with the previous model, the optimised deflecting pulley is some 6.6 mm narrower. As a result, the toothed belt runs over the pulley in a central position, ensuring force is distributed much more effectively on the ball bearing. By making this change, the pulley has been adapted for the conditions faced by this timing assembly.

The INA KITS and SETs can be used for the vehicles specified in the catalogue without restriction.
